Stat Management Suite

The Stat Management Suite from StatView makes managing and distributing stats easier and more reliable on gameday. It starts with the Stat Management Server—a central hub and distribution point for stats data. StatTV displays the stats in HD on TVs in your press box while StatBooks deliver detailed stats directly to members of the media.

Stat Management Server

The Stat Management Server is a small appliance that centralizes your stats. It integrates with StatCrew, your live scoring console, and the Internet to offload work from your stats laptop or PC. The Stat Management Server also provides the backbone for the other products in the suite: StatTV and StatBooks.

Stat Management Server Features and Benefits:

- Off-loads stats distribution from your StatCrew laptops and PCs
- Eliminates the need for a separate PC to perform FTP and other tasks
- Serves as one central repository for stats
- Unlimited support for FTP and web-services distribution of stats including to ESPN, CBS, JumpTV, etc
- Requires no game day maintenance—unlike a PC
- Automatic software updates

The Stat Management Server has a very small footprint: less than 8"x6"x1.5"

Stat Management Server

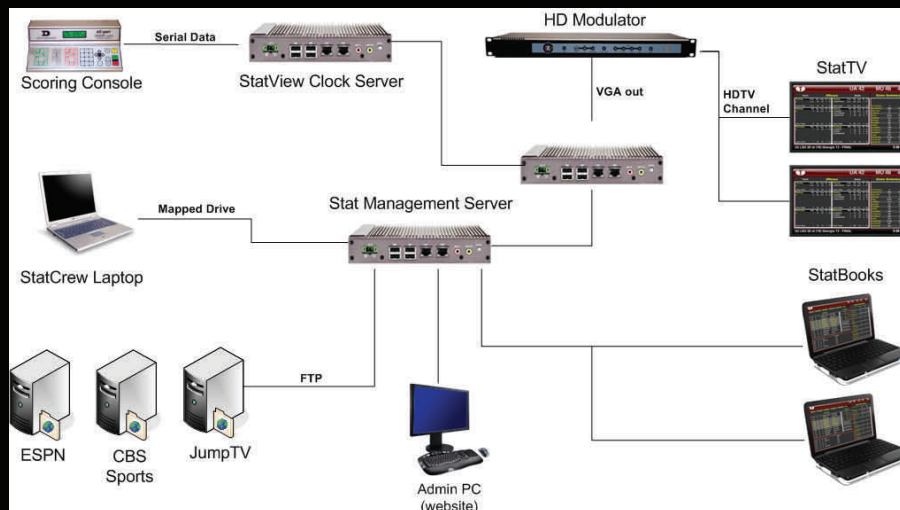

Technical Information

The Stat Management Server appliance requires very little setup. An network connection allows the appliance to talk to the StatCrew laptop or PC. Depending on your configuration a StatView Clock Server may also be required for integration to the scoring console.

Network Integration

- Supports static or dynamic (DHCP) IP addresses.
- High-security network model with outbound HTTP access only over port 80—no inbound IP ports are required.
- Internet connection only required for configuration and use of StatCloud service.
- Appliance configuration managed via web browser.

About StatView

StatView has over a decade of experience in live stats delivery and is used by some of the largest college programs, bowl games and basketball tournaments every year. StatView counts over 450 NCAA colleges and universities as customers. We know what it's like on game day and our experience and commitment to excellence translates into less stress for our customers.

StatView offers a complete suite of products to help manage game day stats. The suite includes the Stat Management Server for trouble-free stats integration and distribution, StatBooks for on-demand stats delivered to the media and StatTV, delivering live stats in high-definition on TVs in your press box.
